

**NEW RANGE ROVER SPORT SV CARBON COMPLETES DYNAMIC LUXURY
PERFORMANCE FLAGSHIP LINE-UP**

6 AUGUST 2025

- **Exquisite details:** Range Rover Sport SV Carbon introduces exclusive ultra-lightweight detailing to complete the new high-performance luxury SUV line-up
- **Carbon detailing:** New model joins Range Rover Sport SV and Range Rover Sport SV Black¹, with a choice of optional sophisticated carbon finishes and colours for the ultimate expression of lightweight performance
- **Assertive design:** The Range Rover Sport SV Carbon is available in a choice of four optional paint colours, as well as curated colours from the SV Premium Palette, with a Forged Carbon exterior pack and Twill Exposed Carbon bonnet enhancing the airflow-honed exterior
- **Interior details:** SV Carbon features a cockpit-like cabin, with Forged Carbon Fibre-backed performance seats featuring integrated headrests, sculpted bolsters and illuminated SV logos, complementing a choice of four interior themes – with the option of the Range Rover SV Bespoke service for further personalisation
- **Blend of Performance:** Featuring the same outstanding performance as previous Editions, Range Rover Sport SV Carbon is powered by a Twin Turbo V8 mild hybrid engine, producing 635PS and 750Nm³

- **Lightweight focus:** Pioneering optional 23-inch Carbon Fibre Wheels contribute to a 76kg total weight saving², improving handling, acceleration and ride quality
- **Carbon brakes:** Lightweight and powerful Carbon Ceramic Brakes option, with exclusive eight-piston SV calipers for outstanding braking performance – with blue, yellow, carbon bronze and black options
- **World premiere:** New Range Rover Sport SV Carbon will make its global debut at Range Rover House during Monterey Car Week on 13 August
- **Stay informed:** Visit www.rangerover.com for more information on the Range Rover Sport line-up, including SV Carbon; now available to order

6 August 2025, Gaydon, UK – The new Range Rover Sport SV Carbon introduces a blend of dynamic capability and sophisticated modern luxury to Range Rover’s performance flagship. Completing the new line-up, offered alongside Range Rover Sport SV and SV Black, Range Rover Sport SV Carbon is the ultimate expression of lightweight performance, featuring carbon finishes and exclusive colours. The new model will make its world premiere on 13 August at Range Rover House during Monterey Car Week.

A curated colour palette includes four options in addition to a curated choice from the SV Premium Palette. The standard Forged Carbon Exterior Pack includes stealthy carbon fibre detailing, including surrounding the Active Quad Exhausts, while a Twill Carbon finish, characterised by its distinctive diagonal weave pattern, and exposed carbon fibre bonnet are also available as an option for clients with a preference.

Range Rover Sport SV Carbon features lightweight 23-inch forged alloy wheels complemented by Anodised Black brake calipers, but clients can choose from a range of further optional enhancements, including ultra-lightweight 23-inch Carbon Fibre Wheels. For the ultimate braking performance, Carbon Ceramic Brakes with optional Blue, Yellow, Carbon Bronze or Black calipers are also available.

Inside, clients can choose from a choice of four interior themes including perforated Windsor Leather seats in Ebony, Rosewood/Ebony, Light Cloud/Ebony or, for those seeking a leather-free option, Cinder Grey/Ebony seats formed from perforated, innovative Ultrafabrics™ material. Forged Carbon detailing extends to the seatbacks and dashboard, with a Twill Carbon finish also available. Extended Moonlight Chrome detailing and SV illuminated treadplates also set the interior apart.

Ryan Miller, Product and Services Marketing Director, Range Rover, said: *“Following the introduction of the previously limited Range Rover Sport SV Edition ONE and Edition TWO, clients now have more choice when it comes to specifying their ultimate luxury performance SUV. Last month we announced the Range Rover Sport SV Black, offering a stealthy, dipped-in-black aesthetic, while the new Range Rover Sport SV Carbon is an assertive interpretation of our luxury performance SUV. Offered alongside Range Rover Sport SV and SV Black, it completes the new line-up showcasing the best of Range Rover’s sophisticated carbon fibre materials, for the ultimate expression of lightweight performance.”*

Under the bonnet a carbon fibre SV engine cover is fitted to the potent 635PS, 750Nm³ 4.4-litre Twin Turbo V8 mild hybrid petrol engine, which is capable of powering Range Rover Sport SV Carbon to a top speed of 180mph.

Range Rover Sport SV is the most powerful and dynamic Range Rover Sport ever, blending supreme performance and dynamism with peerless Range Rover capability, refinement and reductive design. Its performance enhancing technologies include 6D Dynamics Suspension, featuring hydraulic interlinked air suspension with pitch and roll control for maximum composure when cornering, accelerating and braking.

Inside, Body and Soul™ Seat (BASS) technology creates a multi-dimensional audio experience which allows front seat occupants to feel the sound. This sensory audio system provides wellness benefits and an immersive listening experience.

The Range Rover Sport SV Carbon is available to order now at www.rangerover.com

ENDS

¹ Available to order from late 2025

² When fitted with all lightweight options. Compared with Range Rover Sport P530 in nearest equivalent specification. Optional feature.

³ 800Nm combined engine/MHEV output when using Dynamic Launch Mode. 750Nm certified

Notes to Editors
