

India's Safest Hatchback: All-new Altroz Achieves 5-Star Bharat NCAP Rating Across Petrol, Diesel, and CNG Powertrains

Becomes India's only 5-star rated car powered by CNG.

Mumbai, 17 September, 2025: Tata Motors, India's leading automobile manufacturer, today announced that the All-New Altroz has achieved the prestigious 5-star safety rating from Bharat NCAP (B-NCAP). With an impressive score of 29.65/32 in adult occupant protection and 44.9/49 in child occupant protection, the Altroz is now officially India's safest hatchback. Synonymous as the benchmark for safety in its segment, the Altroz was the first hatchback to secure a 5-star rating from Global NCAP in 2020. Notably, it is the only premium hatchback in India to offer petrol, diesel, and CNG powertrains. It has also made history by becoming the first car in its segment and body style to achieve the highest 5-star safety rating under the Bharat NCAP protocol across all its powertrains. Furthermore, it is the only CNG-powered car to secure the highest safety rating. This milestone reaffirms the Altroz's unmatched leadership in both safety and versatility across all its fuel variants.

Celebrating the remarkable safety rating of the Altroz, **Mr. Mohan Savarkar, Vice President & Chief Product Officer, Tata Motors Passenger Vehicles Ltd.** said, *"The Altroz has always been a pioneer in the premium hatchback segment. With its combination of contemporary design, advanced technology, and a multi-powertrain led approach, it truly makes the customer 'Feel Special'. A trendsetter for the industry, the Altroz has once again redefined benchmarks by being the only car in its segment to achieve the coveted 5-star rating by Bharat-NCAP across petrol, diesel, and CNG powertrains, making it the safest hatchback in India. This achievement reaffirms our commitment to deliver cars that our customers can depend on with confidence."*

Launched in May 2025, the All-New Altroz continues its legacy of safety and trust. Built on Tata Motors' proven ALFA (Agile Light Flexible Advanced) architecture, the Altroz with its Diamond Strength Safety Shield ensures enhanced structural rigidity with reinforced crumple zones, setting new benchmarks in occupant protection. India's safest hatchback is equipped with a robust safety suite that includes six airbags, Electronic Stability Program (ESP), and ISOFIX child seat restraints as standard across all personas, coupled with a 360° HD Surround View Camera with Blind View Monitor, Direct TPMS, SOS and Breakdown assistance, Auto Headlamps, Rain-Sensing Wipers, and LED Fog Lamps with cornering function—delivering all-round protection and complete peace of mind on every drive.

Beyond safety, the Altroz elevates the premium quotient with a segment-best digital and cabin experience. A 10.25" Ultra View infotainment system by Harman™ pairs seamlessly with a full-digital HD cluster, supported by a voice-enabled sunroof, wireless Android Auto & Apple CarPlay, wireless charging, dual 65W fast chargers, an air purifier with express cooling, and iRA connected car technology. Soft-touch materials, ambient lighting, and lounge-like rear seating enhance comfort and luxury. On performance, the Altroz stands out as the only premium hatchback in India to offer the widest powertrain range — Petrol, Diesel, and iCNG with twin-cylinder technology — along with multiple transmission choices including a Manual gearbox, DCA, and AMT, making it a truly versatile and premium choice in the segment.
